

Specialized Treatment for Epilepsy

The Northwestern Comprehensive Epilepsy Center maintains the highest designation by the National Association of Epilepsy Centers.

This means we are able to diagnose and treat the more complicated forms of epilepsy and provide help to patients who continue to have seizures despite medications or have questions regarding their diagnosis.

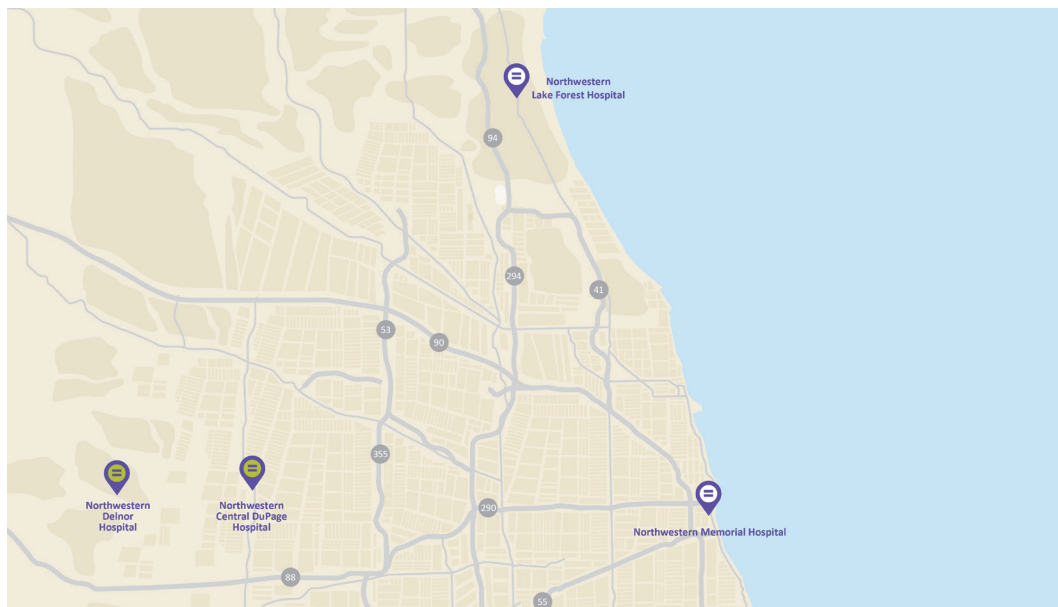

Our Center consists of a multidisciplinary team of epileptologists, neurosurgeons, psychiatrists, nurses, and technologists trained to provide specialized treatment for epilepsy and other seizure disorders. Visit us online at epilepsy.nm.org to meet our team of specialists and learn more about our program.

We offer:

- Second opinions regarding your seizure or epilepsy diagnosis
- Comprehensive epilepsy care
- Inpatient epilepsy monitoring
- Stereo EEG evaluation
- Epilepsy surgery including minimally invasive resections and brain stimulation
- Epilepsy treatment tailored to women
- Clinical research trials
