healthcare provider if you have questions about your diet.

## your dietitian

## Potassium-Restricted Diet

The foods you eat are an important part of managing your health. Some health conditions can be made worse if you eat foods with too much potassium in them. Your healthcare provider has let you know that you need to limit the amount of potassium you eat. This guide will help you choose the right types and amounts of foods.

Low-potassium foods have less than 100 milligrams (mg) per serving.
Medium-potassium foods have 100 to 200 mg per serving.
High-potassium foods have more than 200 mg per serving.

## Serving sizes

Knowing how much of a food is a serving will help you learn how much potassium is in it. Several servings of a low-potassium food can make it a high-potassium choice.
The Nutrition Facts label on packaged foods (see the last page) is a great way to find serving sizes. You can also use these size comparisons to help you estimate about how much of a food you are eating.

- 1 ounce $=4$ dice
- 1 cup = a baseball
- 3 ounces = a deck of cards
- $1 / 2$ cup $=1 / 2$ baseball
- 1 teaspoon (tsp.) = 1 die
- $1 / 4$ cup $=1$ large egg
- 2 tablespoons (Tbsp.) = a ping pong ball

## Potassium in common foods

The tables on the next few pages list many common foods that have high, medium and low amounts of potassium. Please note:

- The whole fruit listed is fresh (raw).
- Some vegetables, such as spinach, "shrink" when they are cooked. The cooked vegetable will have much more potassium than the same amount of raw vegetable.
- White rice, pasta, bread, and other foods made with white or corn flour may be lower in potassium. Brown rice, whole-grain bread, and other foods made with whole-wheat flour, oats, and bran are usually higher.
- Foods that are high in protein may also be high in potassium. This includes some types of dried beans, dairy foods, meat, fish and poultry.
- The milligrams of potassium in a food may vary depending on the brand or type of processing. Values for canned foods may be different than values for fresh foods.

| Fruit and Juice |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Nutrition Facts labels

Nutrition Facts labels are required by the U.S. Food and Drug Administration on most packaged foods and beverages. The FDA introduced a new label format in 2018. You will see one of these two versions of the label on the products you purchase. Food labels are a way to see the amount of calories and key nutrients in the packaged foods you buy.
When checking food labels, always consider the serving size. You may need to adjust your portion size (how much of a food you eat) to match the serving size to stay within your recommended potassium limit.
Serving sizes on food labels may be different than those listed in this guide.

Talk with your dietitian if you have questions about:

- What foods you should or should not eat
- Recommended serving sizes
- How best to prepare foods

## SIDE-BY-SIDE LABEL COMPARISON

## Original

|  |  |
| :--- | :--- | ---: |
| Serving Size 2/3 cup (55g) |  |
| Servings Per Container About 8 |  |

## New

| Nutrition Eacts |  |
| :---: | :---: |
| 8 servings per container |  |
| Serving size 2/3 cup | 2/3 cup (55g) |
| Amount per serving Calories | 230 |
|  | \% Daily Value* |
| Total Fat 8 g | 10\% |
| Saturated Fat 1 g | 5\% |
| Trans Fat 0g |  |
| Cholesterol Omg | 0\% |
| Sodium 160mg | 7\% |
| Total Carbohydrate 37g | 37g 13\% |
| Dietary Fiber 4g | 14\% |
| Total Sugars 12g |  |
| Includes 10g Added Sugars | ed Sugars 20\% |
| Protein 3g |  |
| Vitamin D 2mcg | 10\% |
| Calcium 260mg | 20\% |
| Iron 8mg | 45\% |
| Potassium 235mg | 6\% |
| *The \% Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice. |  |

In 2018, the FDA required potassium to appear on the label (see "New" label). This is to make it easier for you to know how much potassium is in the food you are eating. Most manufacturers are using this version of the label. Some manufacturers have until July 2021 to switch to this label.

Note: These Nutrition Facts labels are meant to show how the new label compares with the original label. Both represent products that are not real.
