AUGUST 28 2021

While Dr. Kadakia seemed knowledgeable and had experience, I thought his bedside manner could use improvement. He appeared impatient with me. When he was accessing my foot and ankle I pulled back

because it was painful. He stopped and looked at me dramatically and stared me down and said "Do you want me to examine you or not?" I thought it was unnecessary and lacked compassion as it is a natural reaction when one has pain to pull back.

He is committed to continuous learning and is a recognized expert in his field. And he's an expert in finding the right spot for a shot with minimal pain. Not everyone can do this.

JULY 21 2021

I was referred to this provider by another surgeon. I drove over 200 miles for this appointment. I had done my research on this provider prior to the appointment and was confident that he is the best. However, the first doctor that came in was dressed in scrubs and states that they are going to surgery shortly and that made the entire appointment feel rushed. I was hoping to actually get surgery scheduled during this visit or at least get a timeframe for it as I will have to arrange hotel/transportation for the surgery.

MAY 4 2021

I was a first time patient. The doctor did not do the examination or assessment. The Assistant and student stood the entire time. When the doctor came in was dressed as if her were ready for a GQ model photo shoot. hurriedly began to explain three options, I interrupted and asked if he could show me what he was referring to and write it down his pause and demeanor compelled me to say "well for me it is a lot of information" The doctor said notes would be found on My Chart without asking if I had access to the internet. He continued to rush through and abruptly ended and asked " so what do you want to do" I said I needed to think about it because it was a lot of information to digest and he got up and walked out and went away. The assistant returned with a copy of gym shoe option I asked some questions about surgery options and she spoke too fast for me to capture and fully understand. I was compelled to ask her "why is everyone talking so fast and in a hurry?" She failed to clearly and calmly differentiate the difference between the options including the doctor. I selected this doctor based on patient reviews and viewing his video on the Northwestern Hosp website. My experience was the complete opposite of the reviews. I've learned the hospital only posts positive reviews (bias)

MAY 1 2021

Dr. Kadakia is not interested in making money from surgery. He has a real interest in treating and helping patients. I trust his judgement 100%. He gives real options and solutions rather than going straight for cutting up people's feet, cutting up around the problem to make money. I wish to remain active for as long as possible and Dr. Kadakia is helping me in that regard.

APRIL 9 2021

Por profesional , le dedica tiempo al paciente y se asegura que todo lo allÃ¡fÃ¡ entendido..

APRIL 9 2021

Dr. Kadakia understands medicine is more than just what is in a report- he speaks with patients, listens to concerns and connects with individuals to get the full picture. He is outstanding in his medical expertise, and equally so in treating patients as individuals, not just case numbers.

APRIL 7 2021

Love his skill and his bedside manner

APRIL 6 2021

Dr. Kadakia has already given my case some consideration before even walking in the door, but unlike other doctors I have seen, he did not pre-judge the case before walking in. Physical examination of feet and ankles was careful, and in outlining a plan for care he was most helpful, even common matters such as finding devices which would really work to expand my shoes' toe-boxes was not relegated to me and he made suggestions on which products to use at home. Other foot doctors I have had were not as considerate.
