FEBRUARY 22 2022

Dr. Kadakia was recommended to me when I was in a horrible car crash. He was hesitant to put me through more unnecessary surgery and I'm so grateful for his candor and care at a time I needed several life saving surgeries. I've seen Dr. Kadakia for seven years for issues related to my lower spinal cord injury and foot issues. Most recently he did a tendon transfer in a new way, an innovative way that suited my specific needs. He has always been professional, kind, so skilled, honest. Thank you for caring for me as a patient above all else and being willing to do this surgery in a new way to help me achieve exactly what I want - to have the best chances not only of having stable ankles (a problem with my nerve injury) and maybe one day achieve the impossible, which is to run again. As a walking paraplegic who was told I may never learn to walk again, running has been a distant dream of mine and it is closer than ever all because of Dr. Kadakia so thank you! His staff is wonderful as well! Thank you Danielle and please please please continue to wear your fun shirts. Those of us who come to your office after being beat up by life live for your uplifting and cute T-shirts! Also, Danielle is the literal best and so are Dr. Kadakia's PAs - Andrea and Brett. I can't say thank you enough to these individuals!

OCTOBER 29 2021

Very good was very astute

OCTOBER 29 2021

consistent. He did my Jones Fracture surgery 5 years ago.

AUGUST 28 2021

While Dr. Kadakia seemed knowledgeable and had experience, I thought his bedside manner could use improvement. He appeared impatient with me. When he was accessing my foot and ankle I pulled back because it was painful. He stopped and looked at me dramatically and stared me down and said "Do you want me to examine you or not?" I thought it was unnecessary and lacked compassion as it is a natural reaction when one has pain to pull back.

AUGUST 28 2021

The great man lived up to his reputation.
