Dr Marks had already read my medical history re the wound & immediately tended to thoroughly cleaning up the wound site with his nurse, clearly explaining his assessment, approach for resolving it and proceeded to then apply special medication for the lower leg site location. He then dressed & covered wound, instructed me re care & management, provided a package of dressings & ointment with daily instructions & scheduled me for a follow up exam. He was most attentive & cautious while cleaning the wound area and providing constant explanations RE his procedure.**
