JULY 31 2021

Dr. Babka is the only physician I have met who actually cares about keeping me active and functional. When I first saw him for my knees, other people kept telling to just quit my exercise program. Not Dr. Babka, he came up with a plan to rehab me safely so I could continue. 2 years later my knees are great, so I came back when my shoulders started bothering me. He always gives you the options and works with you instead of dictating what you should do.
