FEBRUARY 8 2024

Dr. Graham is, by far, one of the best doctors I've worked with, and I'm incredibly grateful that I am one of her patients. My only regret is that I didn't discover her sooner, because she would have helped me significantly. She single-handedly corrected several mistakes made by the head of neurology department at North Shore hospital system on my case. It's truly been a life saver for me. Northwestern is lucky to have her, as are her patients.

OCTOBER 11 2023

Dr. Graham neurologist is one of the best doctors I've ever worked with, and I'm so thankful I became her patient. She's the first doctor who took the time to walk me through my condition, explain test results and MRI diagnostics, and put together a plan of action. She walked me through the timeline of the plan of action, what to expect, and how we're going to tackle my condition. She is incredibly effective

and knowledgeable, and extremely empathetic, which is a rare quality in providers nowadays. I've only worked with her once and I've learned more in my time with her in one visit than I did in 3 months working with North Shore. That alone speaks volumes. I felt so helpless and hopeless working with North shore, and Dr. Graham completely turned that around for me. [name]
