MARCH 19 2022

When you receive a returned call on time it signals to the patient that the Doctor is on his/her game and has done the necessary homework on your case. Many patients are waiting for a diagnosis of a possible life threatening issue, The apprehension of the patient is real and having a doctor acknowledge and respect the patient's concerns by returning a call when promised rates a 10 score in my book any day.

MARCH 18 2022

I don't have enough words to say what an outstanding doctor she is in every way a doctor should be. I've only had one other doctor in my life that took such care, compassion and aggressive action of my health.
