APRIL 20 2021

I really felt like Dr. Wabich *heard* me and what I was saying. She didn't try to put me on more medications, but rather suggested some holistic and natural options instead, which is right down my alley. She is helping me figure out the source of the problem instead of covering it up with a drug, and I have huge appreciation for that! Dr. Wabich also took the time to call me herself to discuss a question I had following a visit with another doctor. I was beside myself and short on words when speaking to her! I've never had my doctor personally call me to touch base before- that just goes to show the extent to which she cares for her patients and goes beyond expectations- she is the epitome of discretionary effort, for sure!
