JANUARY 28 2022

Let me start by saying I wish I could give her 1000 out of 10 because she was so great. I learned more information about my condition in one short visit than I did 3 visits with my old endocrinologist. And I only did she inform me about what was going on with my thyroid, but she also made me feel better about it. She answered every question that I had without making me feel silly for having a question and I definitely feel like she actually cared about me as a person. She didn't just see me as a \$

JANUARY 17 2022
