The procedure seems to have been done well. In particular, the decision to biopsy the scar tissue struck me as admirably proactive. His communication after the procedure was succinct, but clear and complete.

APRIL 13 2022

He clearly outlined procedure and potential outcomes. I awoke during procedure and he narrated as procedure progressed for my further understanding

APRIL 11 2022

I was emotional at the beginning of the procedure because I lost a young relative to colon cancer, and he did not even ask what was the matter. Such a simple thing to do. Then when he sent a note about the polyp in MyChart, his first sentence was, "the tumor appears benign." First, nobody told me I had a "tumor," so this was news to me. Second, it's a neuroendocrine tumor and my doctor had confirmed that there's no such thing as a benign NET—they're all cancer. This kind of news warranted a call.

OCTOBER 21 2020

I have been a patient of Dr Karacic for almost 20 years. I've received great care, follow-up in all these years. However; due to Covid 19 care for patients lacked tremendously. I was recently diagnosed with autoimmune hepatitis. I wasn't able to see my dr sooner than June because of all the Covid policies in place . By the time I was able to see my dr. my diagnoses was so grave I had to be hospitalized via e.r. I was deeply disappointed in NWH, for the 2nd time!
