AUGUST 2 2022

I was first told I had bladder cancer by a physician's assistant after a scan. After my suburban urologist exam confirmed the diagnosis, I was told the call his office to schedule surgery only to find out he was leaving town for a conference and a vacation. It would be at least a month before surgery could be scheduled. I immediately researched Dr. Meeks and called him. He personally called me back. He saw me within three days and I had surgery within a week of my initial diagnosis. Bottom line, I trusted Dr. Meeks with my care and he delivered. I value his level of expertise and skill. I am completely satisfied with his care.

AUGUST 2 2022

Track record, recommendations, peer comments. Good to see the PhD as well as the MD. Means concern for research.
