NOVEMBER 15 2020

I have been coming to NW since 2001 and all my health history is available right there. NW offers in one place all the services and professional health practitioners I would ever need. The only problem I encountered in the past has been with scheduling appointments. Depending with the person I get it can be very smooth or horrible wrong and this is sometimes hard to understand. It seems that Training is the culprit there.

SEPTEMBER 18 2020

Dr Perry, Nurse Linda, front desk staff as well as Ms Lowes and the lady who scheduled the date for surgery were always very professional and thorough and what was going to be done and why. The one person that I like to say thank also is the Resident anesthesiologist because he was compassionate and made feel that I was going to be okay. Dr Garcia did too, but the resident had looked at me and assure me I was going to be okay. The whole crew were incredible from the Urology clinic To out pt registration to the nurse in the surgery room, to the nurses in recovery were super heroes. I remember one nurse gently rubbing my right arm when I started to get anxious with the oxygen mask on. I know Dr Perry do these surgeries every Tuesday & Thursday and that it's not a big deal, but for me it was, because the last time I was in a hospital was with my mom and just put me to sleep & leaving the stent was very scary, because she never came home after those procedures.I don't have money to give but I could say thank you for everything and will say a prayer each one of you and your loved ones!May God always bless you and walk with!

SEPTEMBER 18 2020

This type of experience is unfortunately becoming a rarity in the United States which at one point was the norm.
