MAY 6 2022

**Every visit seems to last 5 minutes. Which, after the effort of getting there, seems like a waste of my time. My most recent visit was very disappointing. It was again, very short. My questions about the CPAP machine were not answered. To be honest, she appeared fairly distracted and uninterested in me as a patient. I then found out that this entire time I could have been submitting orders for equipment through my insurance. In all these years, I have never been told that. I found out on my own. My CPAP equipment has been leaking and I've stopped using it regularly because it is so uncomfortable and I feel like I get no support from her office. I am planning to change doctors.**
