FEBRUARY 15 2022

He took his time to answer my questions and gave me some great advice!

FEBRUARY 11 2022

On the other hand, the doctor's notes are very good. But he cites a medical term in his notes that he never used when I saw him at the office. I only read his notes a couple of days after my visit. By that time, I had already spent a great deal of time doing my own research. Ultimately, I think I agree with his diagnosis, but his 'explanation' at the office was confusing and basically inadequate. It would really help if doctors used the correct medical terminology while face to face with the patient, not only in their notes.
