MARCH 15 2022

I was referred to this physician and was excited to read that she comes very highly recommended from former patients. Reviews stated that she was great at listening to patient history and took time to walk through options for care. Unfortunately, I didn't feel that I was given this level of care and was very disappointed with my visit to the office. The NP that I saw was great and asked a lot of questions, but ultimately I feel that I was just pushed a medication to cover my symptoms rather than digging into the root cause.
