JUNE 24 2022

excellent doctor

JUNE 23 2022

it was a very upsetting appt. The first thing he said when he walked in the room was, "Why are you here why are you seeing me?" I didn't even know how to answer. I saw Dr. Iacob maybe 2 1/2 years ago for five minutes and haven't seen him since. I was referred to him again by my primary care physician. She thought he would be able to deal with my face pain better than my migraine neurologist that I see in downtown Northwestern. He seemed to be very disturbed and upset about this. He was quite angry when he walked in the room, before I even said a sentence. He said I had a whole team of doctors working on me why would I need to come to him. I tried to explain to him that my "team" of neurologist(2 drs dtown) are for my migraines and my primary care physician thought it would be good to see him about my face pain. He did not care, he did not want to listen to me. I do not understand what happened and as I said earlier it's very disturbing. He was dismissive cruel and rude. I've never been treated like this before and I'm not even sure what happened. It was a terrible experience and I still can't believe he did what he did. This all happened in a matter of less than 5 minutes.

JUNE 23 2022

MAY 7 2022

Dr iacob, is very patient and understanding My son came with for one of my appointments had many questions about my ALS and Dr iacob took the time to explain it to him My Dad (Phillip King) passed away from ALS June 1,2016 and he told me to see Dr iacob to find out what was wrong with my hand When Dr iacob came in to see my dad in CDH my dad motioned to my mom he wanted Dr iacob to talk to me and Dr did I and my first appointment with Dr iacob a few days later and have seen him ever since

MAY 4 2022

The same reason as above.

MAY 2 2022

Dr iacob is one of the worst providers I have ever had to meet with. He does not provide any answers or helpful information about my diagnosis or care during appointments. He spends all appointments trying to rush me out. While we are in the office, he is charting very detailed information and not focusing on me. I do not have access to this charting or the information in there so this does not help me at all. The notes and after visit summaries I receive have barley any detail in them regarding my care or next steps. I am the kind of person who wants to be involved in their care plan and understand the "why" behind decisions being made about my care. I come prepared with questions I want to ask saved in my phone, and I try to type his response but like I said, he does not answer my questions or provide the care I need. I can tell he is very intelligent, knowledgeable, and experienced in neurology but what good is that to me if he will not work with me on making sure I understand what is going on and how I can care for myself with my new lifelong diagnosis.

Caring

MARCH 25 2022

I trust him with my care. He listens to all my issues and concerns. I never feel rushed and he works with me for my treatment.

MARCH 25 2022

He was rude because he was upset that I had the nerve to be there because he looked at my chart and didn't see a reason to be there but I hadn't been diagnosed although I knew I had a problem with my nerves and he did in fact diagnosed me with a nerve disorder and planned on treating me for this disorder but never apologized for entering the room rudely scolding me. I came there desperately seeking help with something I knew was going on with my nerves in my neck. I'm depressed from the constant pain and to be scolded instead of helped, I'll never return to that location again
