MAY 26 2021

I am a new patient and I had been experiencing jerks in my heart that occurred when I would try and fall asleep. Dr. Stone spent 90 minutes with me meticulously asking me questions and listening to my feedback. He did an ECG in the office and subsequently ordered several tests. Instead of diagnosing me right away, he told me that we have to find out what is going on with me. Since then, I have had several correspondences that Dr. Stone himself took the time to answer. He also doesn't brush off my questions and he gives me hope, guidance, and patience as he is patiently working with me to figure out what is going on with me to improve my health.
