JUNE 29 2021

She is trying to uncover the cause of my stroke. Dr. Gutti has given me good advice on how to avoid future strokes. I truly appreciate her kind demeanor.

JUNE 15 2021

She listened to me and answered all my questions. She was very reassuring and made me feel better about my situation

JUNE 8 2021

I appreciate that she took time in my first visit to spend extra time to ask on many symptom areas and family history. She was also able to take time to listen to my ideas and things I had tried to resolve pain.

MAY 25 2021

The attending doctor used leading questions. She had her mind made up and took no new information on board. Her very attentive practice nurse had asked me a slew of questions before the doctor came in, yet the doctor refused to read any of it. This made me anxious and tense. I'm mentally ill and being put on the spot didn't make me feel like I was valued. My symptoms were trivialized and pawned off as 'psychological' instead of the doctor ensuring that they weren't physiological, which was the entire intent of my visit.
