I am a new patient. Dr. Cohen was highly recommended by my primary care physician. At our first telemedicine meeting, Dr. Cohen took the time to take a very comprehensive history from me and to review my CT scan. At our second meeting he reviewed the results of my pulmonary function test with me and answered all my questions. My two meetings with Dr. Cohen lead me to conclude he is careful, knowledgeable and experienced. I am confident that he will provide me superior advice and medical care.

JULY 4 2020

Skilled, sensitive and compassionate care. Dr. Cohen always takes a little time to stop typing and make eye contact for a minute in our sessions. He is engaging, easy to talk to and appears genuinely interested in me as a person not just another patient. When we recently needed to do a phone session he took time to listen and fully answer my questions without appearing rushed and continuing to sound truly interested in my issue.. Dr. Cohen works with his own team and his nurse Linda is far above the average when it comes to compassionate patient care. Linda will take time to go to meet you at your appointment to give you Novocaine before having blood gases drawn. If you are scheduled with a morning test that requires fasting and you are a coffee drinker Linda has been known to show up with a cup coffee after the test is complete. .I would not just recommend Dr. Cohen and Linda I would strongly encourage anyone needing pulmonary care to meet with them. I can not imagine being able to find such expertise and compassion anywhere else!
